A minimally invasive procedure to reduce the size of the stomach, which will subsequently lower your food intake and helps in weight loss.

It benefits those who struggles with obesity & weight loss as follows:

- Remission of diabetes and metabolic disorders

- Lower risk of obesity-related health conditions (type 2 diabetes, high cholesterol & blood pressure)
- Improve other medical conditions (cardiovascular health, fertility, sleep apnea, joint pain relief and more)

Most importantly, the improvement in your quality of life!

Package inclusive of:

**3D/2N hospital stay
(Single room)**

Dietitian Counselling

Pre-operative test

In room food & beverage

**Medications & consumables
used during stay**

Dr. Mohd Faisal Jabar
